Set Up an Email Account on iPhones iOS7 or higher

For Apple iPhone with iOS 7 or higher.

Learn how to set up an email account to send and receive email with your iPhone.

GENERAL SETUP

1. Open the settings and tap PASSWORDS & ACCOUNTS.
    if you are using iOS 10.3.3 or older, under Settings, tap MAIL > ACCOUNTS.

2. Tap ADD ACCOUNT > OTHER.

3. Tap on ADD MAIL ACCOUNT.

4. Enter your account details and tap NEXT.

ACCOUNT DETAILS

FIELD	INPUT
Name	The name others will see when receiving your mail.
Email	The complete email address of your 1&1 IONOS email account.
Password	The password you entered when setting up the 1&1 IONOS email address.
Description	Enter a description for your account here. This information is only used to better differentiate your account from one another.

SERVER SETUP

1. Receive your mail using the IMAP (recommended) by entering the respective host name for Incoming Mail Server.

2. Enter the remaining data and tap NEXT.

INCOMING EMAIL SERVER

FIELD	INPUT
Hostname	imap.ionos.co.uk or (recommended) pop.ionos.co.uk
Username	The full email address of your 1&1 IONOS email account
Password	The password you entered when setting up the 1&1 IONOS email address

OUTGOING EMAIL SERVER

FIELD	INPUT
Hostname	smtp.ionos.co.uk
Username	The full email address of your 1&1 IONOS email account
Password	The password you entered when setting up the 1&1 IONOS email address

Please Note:
- The email account is automatically set up with SSL encryption. The device performs the correct configuration in the background. You no longer must set anything manually.
- The SSL settings can also be checked later. For more information, see Enabling SSL encryption on your iPhone/iPod/iPad.

Synchronisation Options

Select which data (mail, notes) you want to synchronise and confirm with SAVE.
Your email account is now set up. You can now check your mailbox and send emails on your iPhone.
